## Year 1 and 2 Knowledge Organiser Science – Animals including Humans

			/ Illinois mercanig marians	
Key Vocabulary			What a human needs to survive and stay healthy:	
survive	99999	You continue to live.	Food and water	All animals, including humans, need food and water to survive. Food gives animals energy to move and grow, while water keeps their bodies healthy and helps them stay alive.
energy		The strength to be able to do things.	Air	All animals, including humans, need air to survive. Air has something called oxygen, which helps our bodies work properly.  Without air, we wouldn't be able to breathe, and our bodies couldn't survive.
healthy	+4	Someone who is well and is not ill or poorly	Exercise	Exercise is any movement that helps our bodies stay strong and healthy.  When we exercise, our hearts beat faster, and we feel more energetic.  Exercise also helps our muscles, bones, and minds stay strong.
oxygen	္စီO <sub>2</sub> ္လ	A colourless gas in the air. Humans breathe it in to survive.	Good hygiene	Good hygiene is important to keep us clean and healthy. Humans should brush their teeth twice a day, wash their hands regularly and clean their body in the shower. Rooms should be kept tidy and cleaned often to stop the spread of germs.
energetic		When you are full of energy and do not tire easily.		me spieda of germs.
				K - Control
	FART			Key facts:
hygiene		Keeping yourself and everything around you clean.	Food groups	There are five food groups:  • Fruits and vegetables – carrots, tomatoes and strawberries etc  • Carbohydrates – bread, rice and pasta
hygiene	m	Keeping yourself and everything around you clean.  An insect in the stage of its life before it has become and adult.	Food groups	There are five food groups:  • Fruits and vegetables – carrots, tomatoes and strawberries etc
		An insect in the stage of its life before it has become and adult.  Muscles are inside your body. They are connected to the bone		<ul> <li>There are five food groups:</li> <li>Fruits and vegetables – carrots, tomatoes and strawberries etc</li> <li>Carbohydrates – bread, rice and pasta</li> <li>Proteins – meat, fish and lentils etc</li> <li>Dairy – milk, yoghurt, cheese etc</li> <li>Fats – oils, butter, nuts etc</li> <li>A human needs to eat a variety of each food group in order to stay healthy.</li> </ul>
pupa		An insect in the stage of its life before it has become and adult.	Food groups Offspring	<ul> <li>There are five food groups:</li> <li>Fruits and vegetables – carrots, tomatoes and strawberries etc</li> <li>Carbohydrates – bread, rice and pasta</li> <li>Proteins – meat, fish and lentils etc</li> <li>Dairy – milk, yoghurt, cheese etc</li> <li>Fats – oils, butter, nuts etc</li> <li>A human needs to eat a variety of each food group in order to stay healthy.</li> <li>Animals including humans have offspring. A human's offspring is called a baby. A chicken's offspring is called a chick. A cat's offspring is</li> </ul>
pupa		An insect in the stage of its life before it has become and adult.  Muscles are inside your body. They are connected to the bone		<ul> <li>There are five food groups:</li> <li>Fruits and vegetables – carrots, tomatoes and strawberries etc</li> <li>Carbohydrates – bread, rice and pasta</li> <li>Proteins – meat, fish and lentils etc</li> <li>Dairy – milk, yoghurt, cheese etc</li> <li>Fats – oils, butter, nuts etc</li> <li>A human needs to eat a variety of each food group in order to stay healthy.</li> <li>Animals including humans have offspring. A human's offspring is called</li> </ul>
pupa muscles bones		An insect in the stage of its life before it has become and adult.  Muscles are inside your body. They are connected to the bone and help you to move.  Bones are inside your body. They make up your skeleton.		<ul> <li>There are five food groups:</li> <li>Fruits and vegetables – carrots, tomatoes and strawberries etc</li> <li>Carbohydrates – bread, rice and pasta</li> <li>Proteins – meat, fish and lentils etc</li> <li>Dairy – milk, yoghurt, cheese etc</li> <li>Fats – oils, butter, nuts etc</li> <li>A human needs to eat a variety of each food group in order to stay healthy.</li> <li>Animals including humans have offspring. A human's offspring is called a baby. A chicken's offspring is called a chick. A cat's offspring is called a kitten.</li> <li>All offspring will eventually grow to be an adult. There are different stages at which they grow at:</li> </ul>
